GitHub: github.com/AKASH-22203 | Portfolio: akash-22203.github.io/profile/

Recent *Computer Science graduate* with expertise in *Full-Stack MERN Development* and *DevOps*. Proficient in *MongoDB, Express.js, React, and Node.js*, alongside a strong foundation in *SQL, Java, and Python*. Experienced in building *intuitive web interfaces, automated QA lifecycles*. A passionate *problem-solver* aiming to contribute as a versatile *Software Engineer or DevOps* professional to drive *efficiency* and *impactful results*.

PROFESSIONAL EXPERIENCE:

Associate – Data Operations | Consilio India

Jul 2025 – Nov 2025

- Optimized data flow processes and ensured high accuracy across business operations, improving overall system reliability and efficiency.
- Managed eDiscovery workflows via the Relativity platform, supporting complex legal and compliance requirements for global clients.
- Collaborated with cross-functional teams to maintain data integrity and support business continuity in critical, time-sensitive operations.

Intern – QA Common Dev | Altair India

Jan 2025 – Jul 2025

- Executed full QA lifecycles, including manual testing and bug tracking using Jira and Xray for enterprise-level software.
- Identified 60+ bugs (including 2 blockers and 8 critical issues), significantly improving product stability before market release.
- Supported major deployments by validating high-priority fixes and reinforcing software quality assurance best practices.

Intern – Web Developer | DevMinds

Oct 2023 – Nov 2023

- Engineered a full-stack Task Management application using the MERN stack, implementing real-time CRUD operations and persistent data storage.
- Developed dynamic front-end components with React.js, utilizing state management to ensure a responsive UI across all devices.
- Streamlined development workflows by applying UI/UX best practices and refreshing core web systems understanding.

Projects:

Sign Language Detection | Technologies: HTML | CSS | JavaScript | Keras model | API Endpoints | Flask

- Live Sign Language Detection:** Activates the user's *camera* to capture *live video feed* and detect signs in *real-time*, providing immediate *feedback* and *translation*.
- Image Upload Detection:** Users can upload an *image* containing a *hand sign*, and the system will analyze and *identify* the sign depicted.
- Video Upload Detection:** Allows users to upload a *video file*, which the system processes to *detect* and *translate* signs present in the *video frames*.

Quiz Application | Technologies: Java | Swing | AWT

- Developed a multi-tiered desktop application using Java Swing, featuring a custom-built GUI with distinct modules for user authentication, rule validation, and dynamic quiz progression.
- Engineered a real-time scoring engine and interactive timer functionality, utilizing event-driven programming to manage state transitions and provide instant user feedback

Music Player | Technologies: HTML | CSS | JavaScript

- Developed a dynamic web-based music player** featuring a custom User Interface and core playback controls, including play, pause, stop, and track navigation.
- Engineered a scalable data structure** using JavaScript arrays to manage tracklists, allowing for seamless integration and rendering of new audio assets and metadata.

QR Generator & Scanner | Technologies: Python | OpenCV | PyQRCode

- Developed a dual-purpose Python utility to generate high-resolution QR codes and scan them in real-time using Computer Vision (OpenCV).
- Implemented an automated scanning system that utilizes a webcam to detect, decode, and instantly launch embedded URLs in a web browser, streamlining user interaction.
- Engineered a custom generation script that encodes data into multiple formats (PNG/SVG) with adjustable scaling, ensuring the QR codes are optimized for both digital and print use.

Skills:

- Languages: Java, Python, JavaScript (ES6+), SQL, C, Groovy.
- Full-Stack Development: React.js, Node.js, Express.js, MongoDB, Django, HTML5, CSS3.
- DevOps & Tools: AWS, Docker, Terraform, Jenkins, Maven, Git/GitHub, VS Code.
- Testing & QA: Manual & Automation Testing, Jira, Xray, Katalon, API Testing.
- Specialized Platforms: Relativity (eDiscovery), Keras (Model Integration), Flask.

Education

- | | |
|---|---------------------------|
| ✓ Dayananda Sagar Academy of Technology and Management (DSATM) | Dec 2021 – Oct 2025 |
| B.E. in Computer Science & Engineering | CGPA: 9.13 |
| ✓ Sarvajna PU College of Science | 2019 – 2021 |
| Higher Secondary (PUC – Science) | Percentage: 91.16% |
| ✓ Adarsha Vidyalaya (RMSA) Channur | 2014 – 2019 |
| Secondary School (Class X) | Percentage: 91.68% |

Achievements

- ✓ Coordinator of CodeArena (Hackathon) event held at college.
- ✓ Active participant in Algosphere events, including Tic-Tac-Toe and Capture the Flag competitions.
- ✓ Participated in CyberQuest (AIML Department Hackathon), gaining exposure to collaborative problem-solving and innovation.

Certifications

- ✓ Java for beginners-Infosys Springboard
- ✓ Python certification IBM.
- ✓ Programming using C - Infosys Springboard
- ✓ DBMS Course-Master the Fundamentals and Advanced Concepts-Scaler
- ✓ Computer Networking-Cisco

Soft Skills : *Communication | Decision Making | Time Management*
